

(a) Collaboration ties present

- No conn. (Ambiguous)
- Low
- Medium
- High (Match, highest level of fit)

(b) Collaboration ties absent

Wetland connectivity level

- Low (Match)
- Medium
- High (Mismatch, lowest level of fit)

Fig 7. Bilateral matching of wetland connectivity and collaboration. Purple links are referred to as "ambiguous mismatches" since the collaboration might still be relevant for wetland connectivity of other types than assessed in paper 5 (e.g., through hydrology), or may be of value to initiate a wetland restoration project.
